PROFESSIONAL SUMMARY

Bilingual (French/English) IT and cybersecurity professional with an M.S. in Information Assurance and experience supporting global enterprise SaaS environments, identity and access-related issues, secure systems, and incident workflows. Background includes Active Directory, Microsoft 365, authentication and permission troubleshooting, log and API analysis, SIEM monitoring, endpoint security, phishing investigation, vulnerability workflows, networking, cloud technologies, scripting, root-cause analysis, and technical escalation.

TECHNICAL SKILLS

Identity & Access: Active Directory | Microsoft 365 | User Accounts | Account Provisioning Support | Password Resets | Authentication | Authorization/Permissions | Access Troubleshooting

Security Operations: CrowdStrike | Elastic SIEM | KQL | Splunk | Security Alert Review | Incident Triage | Phishing Analysis | Vulnerability Workflows | Bugcrowd

Security & Network Tools: Nmap | Burp Suite | SQLMap | Malware Analysis | VPN | TCP/IP | DNS | DHCP

Systems & Support: Windows | Linux (Ubuntu, Kali) | macOS | SaaS Support | API Troubleshooting | Log Analysis | Ticketing Systems | Incident Escalation | Root-Cause Analysis

Cloud, Scripting & Data: Azure | AWS | Python | JavaScript | SQL | PostgreSQL | MySQL | SQL Server | MongoDB | Git

Enterprise Tools: Jira | Slack | Salesforce | Tableau | Excel | RingCentral | CCAI

Languages: French (Fluent) | English (Fluent)

PROFESSIONAL EXPERIENCE

Technical Support Specialist - Bilingual French | Geotab, Oakville, Ontario, Canada | July 2025 - Present

- Provide enterprise-level technical support for large-scale telematics and SaaS platforms supporting commercial fleet customers across North America and international markets in French and English.
- Troubleshoot application, device, connectivity, authentication, authorization/permission, account access, and API integration issues through log analysis, request/response review, system diagnostics, and structured troubleshooting.
- Investigate API authentication failures, permission errors, integration behavior, backend workflows, and data inconsistencies across connected enterprise systems.
- Use scripting and structured queries to validate data, reproduce technical issues, isolate failure points, and support root-cause analysis and engineering investigations.
- Document investigation findings, maintain detailed technical case records, and escalate complex incidents through structured support and incident-management workflows.
- Collaborate cross-functionally with engineering and operations teams to resolve customer-impacting incidents, recurring technical issues, and platform reliability concerns.

Internal Cybersecurity Operations Program | Geotab | January 2026 - March 2026

- Participated in enterprise cybersecurity workflows spanning SOC monitoring, security alert review, incident triage, phishing investigations, vulnerability management, and software security approvals.
- Worked with CrowdStrike, Elastic SIEM, KQL, Google Admin, and Bugcrowd in security investigation and monitoring workflows.
- Reviewed security alerts, detection logic, endpoint telemetry, SIEM data, phishing indicators, vulnerability reports, and incident escalation procedures.
- Applied security log analysis and investigation concepts to understand alert context, detection and triage processes, and cross-team incident handling.

Professional Tutor - Math and Computer Skills | Wilmington University, New Castle, Delaware | March 2019 - June 2023

- Tutored students one-on-one in mathematics and computer skills, adapting instruction to different learning needs and technical skill levels.
- Developed customized study materials, practice exercises, and exam-preparation resources to strengthen student understanding and academic performance.
- Supported students in developing problem-solving, computer literacy, and technical troubleshooting skills.
- Helped improve student performance, with an average exam score of 90%.

Bilingual IT Support Assistant | Wilmington University, New Castle, Delaware | September 2018 - May 2022

- Delivered Level 1 bilingual IT support for students, faculty, classrooms, and campus facilities, including device setup, account setup, password resets, and software troubleshooting.
- Supported user account and access issues, monitored classroom IT environments, and ensured systems were operational before lectures.
- Translated technical documentation between English and French to improve accessibility and end-user support.

Help Desk Technician | Rowan College at Burlington County, Mount Laurel, New Jersey | August 2015 - May 2018

- Delivered Level 1 support for software, hardware, user-account, and network issues through an internal ticketing system.
- Administered Active Directory user accounts, including user setup and password resets, and supported email, network, and system maintenance.
- Supported the security, confidentiality, and availability of campus computer networks and databases.

EDUCATION

Seneca Polytechnic - Ontario Graduate Certificate in Business Information Technology | April 2025 | Toronto, Ontario, Canada

GPA: 4.0 | Focus: Cloud solutions, programming, networking, enterprise projects, and IT work term.

Wilmington University - M.S., Information Systems Technology (Information Assurance) | May 2022 | Wilmington, Delaware, USA

GPA: 4.0 | College of Technology Graduate Academic Award | Information assurance policy, Windows/Linux security, and virtual environments.

Wilmington University - B.S., Computer Science | May 2020 | Wilmington, Delaware, USA

GPA: 3.77 | Dean's List and Honor Roll.

Rowan College at Burlington County - A.S., Business Administration | May 2018 | Mount Laurel, New Jersey, USA

GPA: 3.5 | Dean's List and Honor Roll.

CERTIFICATES & ADDITIONAL CREDENTIALS

Certificate in Web Applications Development | Management Information Systems Certificate - Wilmington University | TEF Canada - French proficiency
